

Deep Dive (or at least a little deeper!)

Martin Catherall

Data Analytics Consultant ADAICO.ai

@MartyCatherall www.MartinCatherall.com

Data Architect

- SQL Server
 - Since 2002
- Microsoft Azure
 - Since 2015
- Microsoft Fabric
 - Since 2022

Agenda and content

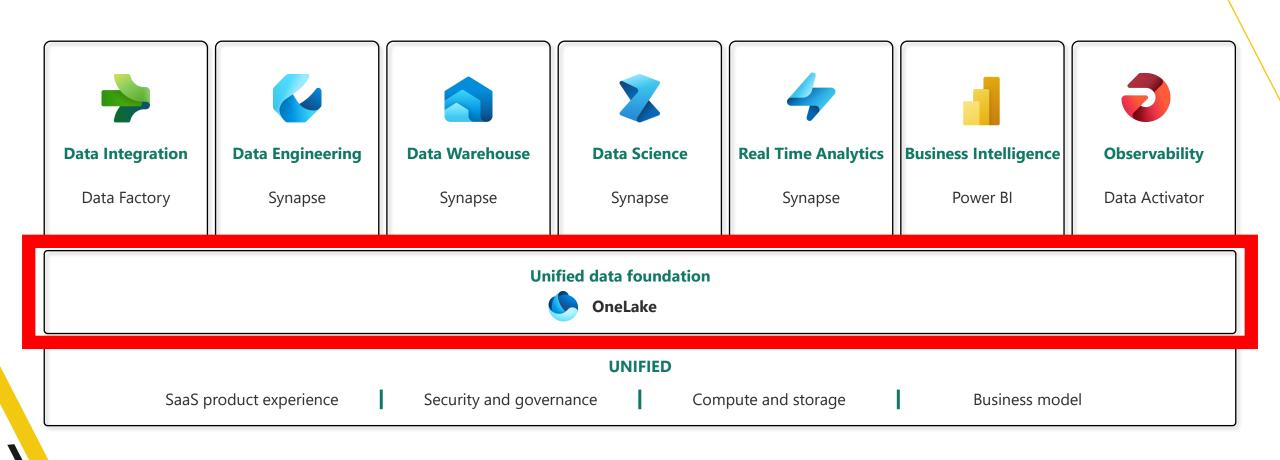

- OneLake short recap
 - Real Time Intelligence
- Diving into the Lake (hopefully not the swamp)
- Going between lakehouses
- DELTA PARQUET
- OPTIMIZE
- VACUUM
- ?????
- Direct Lake and Power BI (DAX)

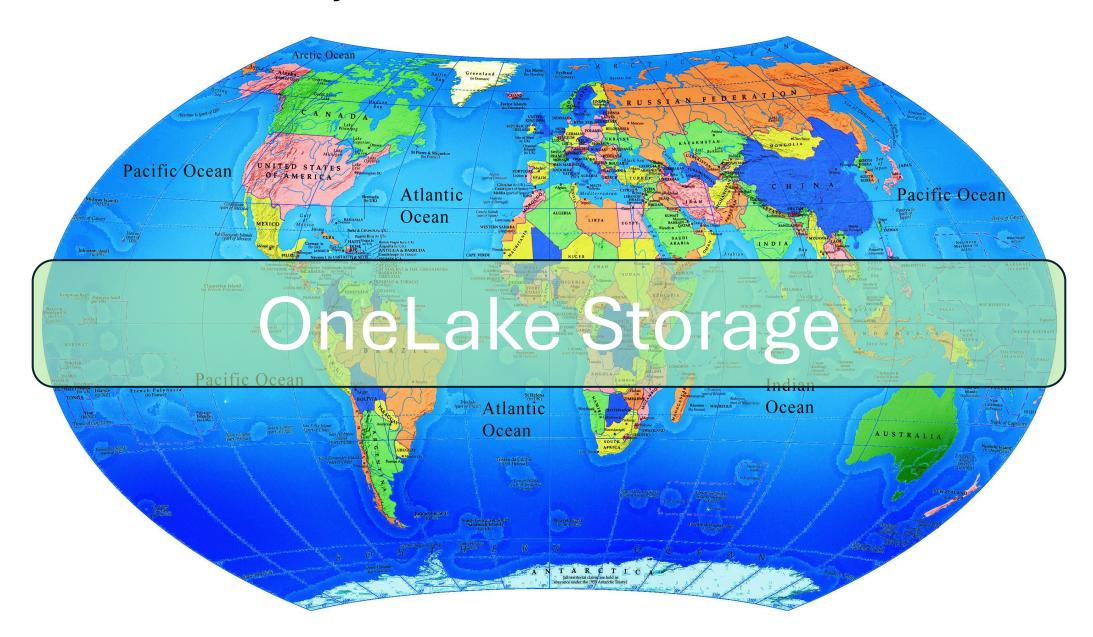

Resources

• Data Engineering documentation in Microsoft Fabric

Microsoft Fabric does it all—in a unified solution

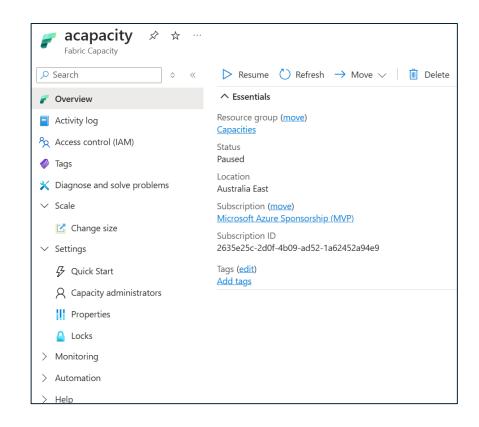

An end-to-end analytics platform that brings together all the data and analytics tools that organizations need to go from the data lake to the business user

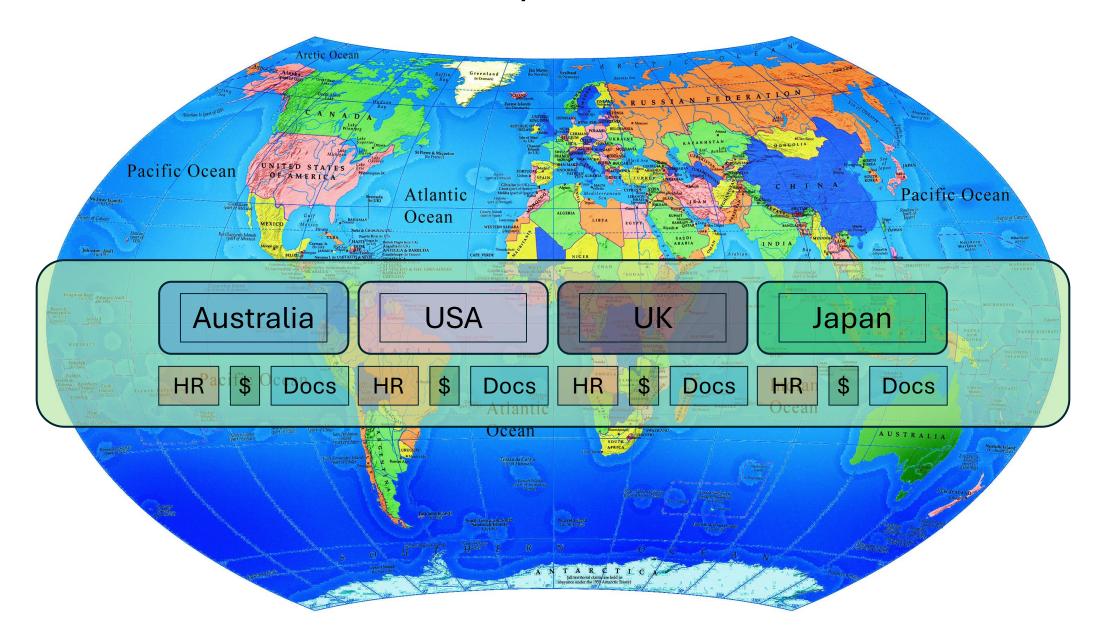

Use a Fabric Capacity Set up in the Azure Portal

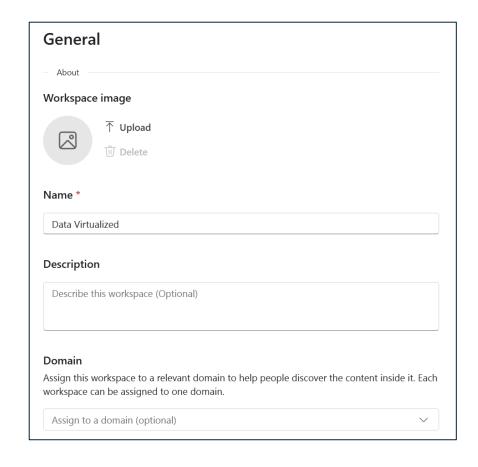

SKU	Capacity Units
F2	2
F4	4
F8	8
F16	16
F32	32
F64	64
F128	128
F256	256
F512	512
F1024	1024
F2048	2048

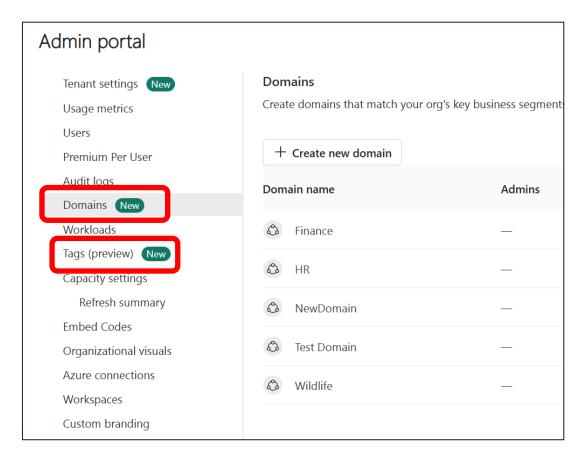

OneLake – How to divide this up further?

Use further Fabric Capacities

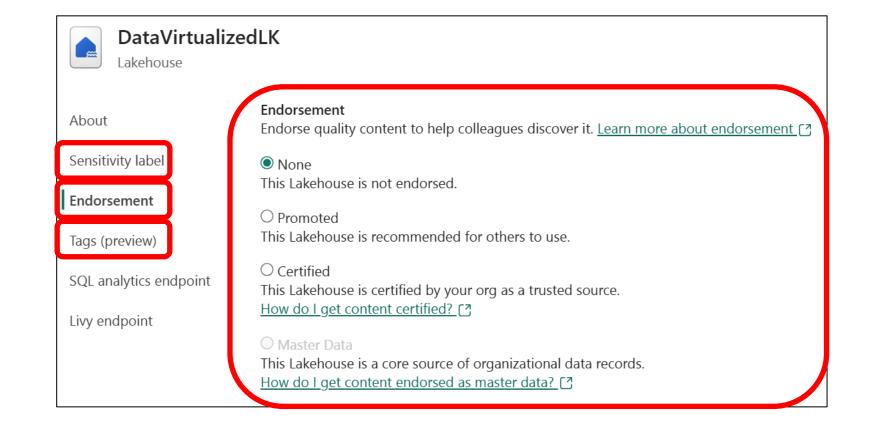

Use Domains

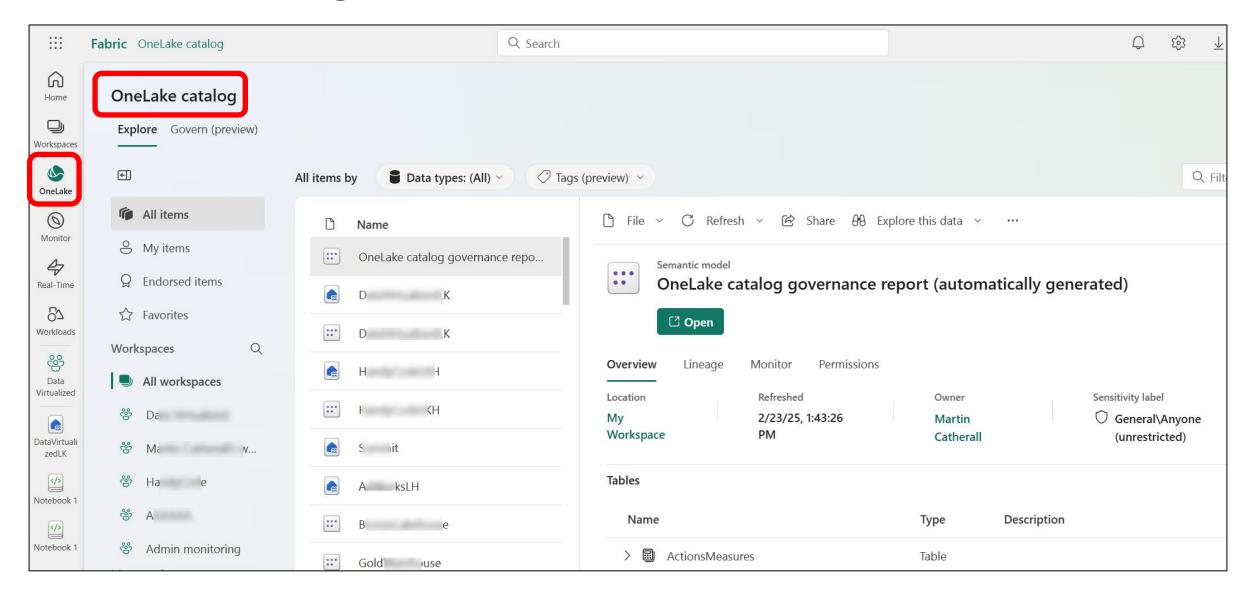

Other feature to aid your Data Governance

- Endorsements
 - None
 - Promoted
 - Certified
 - Master Data
- Sensitivity Labels
- Tagging
- Task Flows

OneLake catalog governance report (automatically generated)

OneLake Catalog

OneLake Data

- The Lakehouse
 - Files (any type)
 - Structured Data
 - Tables Parquet files (delta)
- The Warehouse
 - Structured Data
 - Tables Parquet files (delta)

Demo

Accessing data and using shortcuts

OneLake Data – The anatomy of Delta

Why Parquet?

- Data is stored in columns (not rows)
- Can be accessed for most languages
- Has great compression
- Is an Open Standard (no vendor lock in)
- Good data type support
 - And the *delta* adds more

Demo

Let's see those parquet files

OneLake file explorer

OneLake Data – Accessing data

Optimize

OneLake Data – Maintenance of Delta
